-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,8,9 are rejected under 35 U.S.C. 102(b) as being anticipated by the German '128 publication. This publication shows a grinding element including segments 3, fastening frame 4, grinder stone frame 1A, bonding agent 5, and fastening device 6.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3,5-7,10,12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over German '128. The limitations of these claims would have been obvious design choices once the basic apparatus was known. For example, the composition of the bonding agent and fastening frame would depend on several factors such as material being treated and desired maintenance costs.

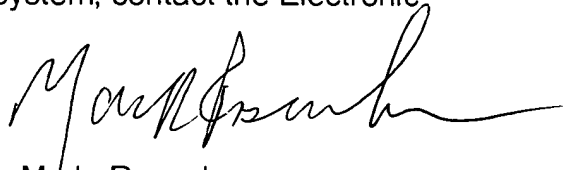

Claims 4,11 are rejected under 35 U.S.C. 103(a) as being unpatentable over German '128 as applied to claim 1 above, and further in view of German '890. German

'128 does not utilize a fastening sleeve which increases assembly/disassembly procedures. German '890 shows a similar apparatus including the use of a fastening sleeve. In order to reduce assembly/disassembly costs, it would have been obvious for one of ordinary skill in the art to modify German '128 by using a fastening sleeve, taught to be desirable by German '890.
